

Computer Science Students Win Awards at Graduate Research Fair

University of Missouri – St. Louis Graduate Research Fair is an annual event for showcasing graduate research projects. The event is open to the public and includes two rounds of judging with cash awards. This year's event included 50 poster presentations from diverse disciplines spanning the University.

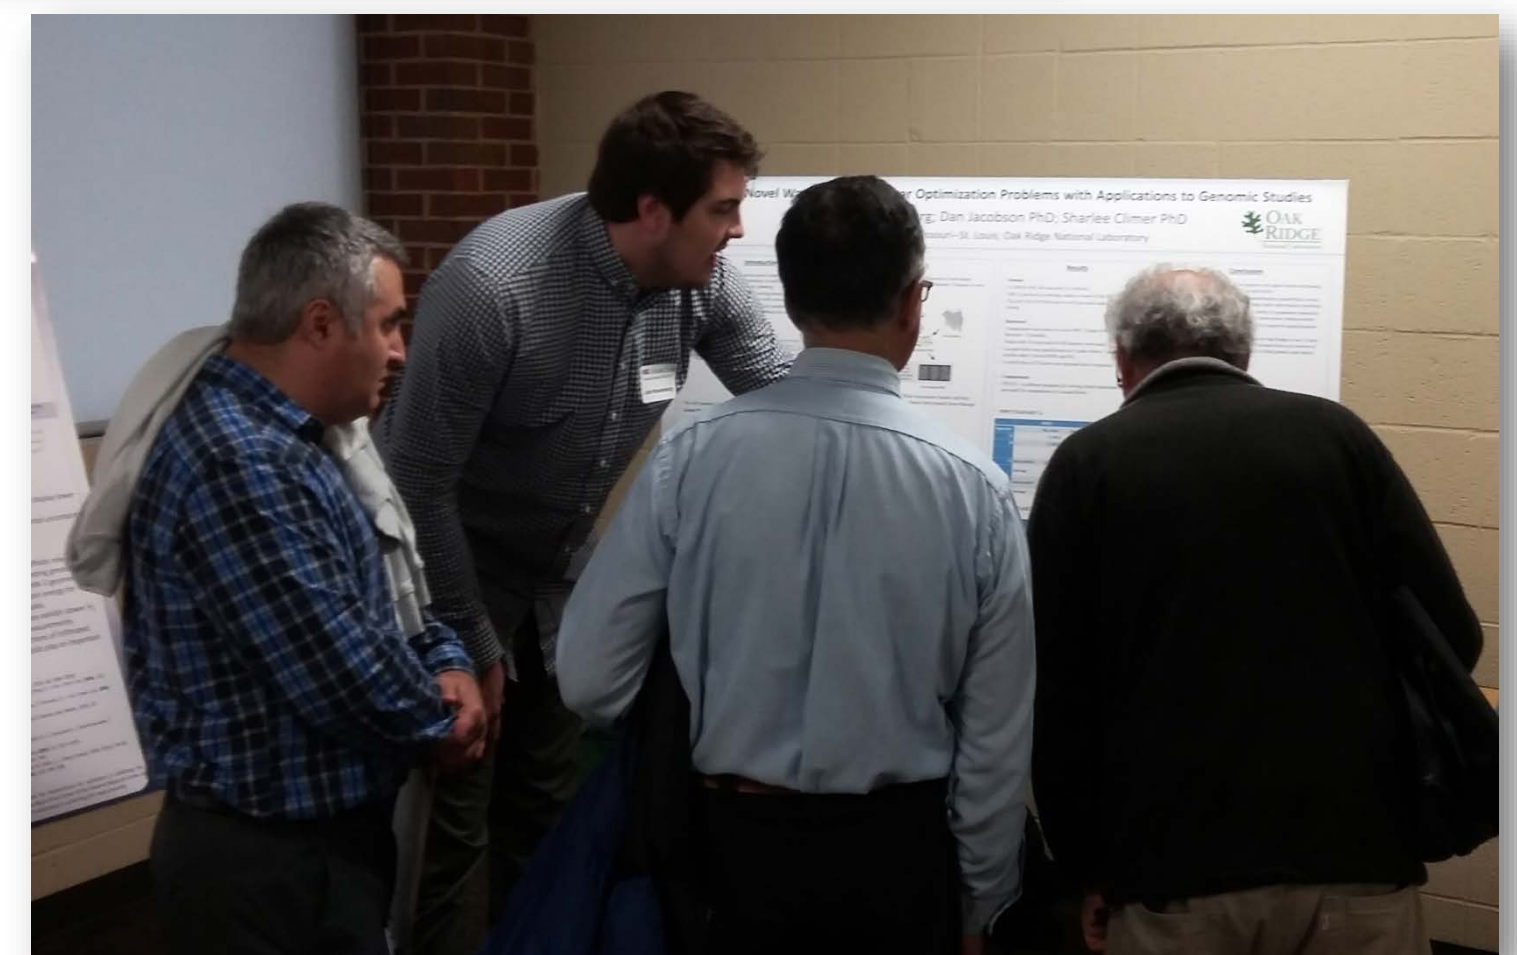

***Mathematics,
Computer Science,
and Natural Science
Division***

Master's student
Matthew Lane was
awarded 2nd Place
in Round 2 (\$200)
for his research of
Alzheimer Disease
proteins using a
network model

***Mathematics and
Computer Science
Division***

Master's student John
Brandenburg was
awarded 1st Place in
Round 1 (\$100) for his
research on
combinations of genetic
markers associated with
Alzheimer Disease

Matt's research was mentored by Dr. Sharlee Climer, Dr. Sanjiv Bhatia, and Dr. Cezary Janikow, along with Dr. Carlos Cruchaga at Washington University's School of Medicine. John's research was mentored by Dr. Sharlee Climer, Dr. Sanjiv Bhatia, and Dr. Wenjie He, along with Dr. Daniel Jacobson at Oak Ridge National Laboratory. The winning posters can be viewed here: [Matt's poster](#), [John's poster](#).
